

M/Y Amon

AMON is an elegant, powerful Aicon 90 ft motor yacht. Built in 2007 and designed by Marco Mannino, she is defined by her sleek, geometric lines and large open spaces. She accommodates 10-11 guests comfortably lodged in five spacious cabins. Each cabin is equipped with en suite bathrooms, with an additional day bathroom on the main deck. Dining can be enjoyed indoors in the tranquility of neutral beige colors and large windows with picturesque views or outdoors under the cover of a bimini, not to be overshadowed by the large, adjacent sun deck. The fore main deck also has a lovely large sun cushion. She cruises at speeds up to 28 knots powered by two CAT C32 engines. She is crewed by an exceptional staff of five. Her aft has an easy access to the sea where one can enjoy the sea and the yachts sea toys. There is a comfortable Jacuzzi on the sun deck, perfect for enjoying while cruising.
